## JAVA FULL STACK DEVELOPER

Skilled Java Full Stack Developer with expertise in Java, Spring Boot, Hibernate, jsp, and database technologies. Experienced in building scalable and user-friendly web applications, solving complex challenges, and collaborating in agile teams. Proficient in delivering high-quality solutions aligned with business goals while ensuring timely delivery. Passionate about learning new technologies and contributing to innovative, impactful projects.

---

## KEY COMPETENCIES

Web Development

Programming Skills

Frameworks & Libraries

Report writing and presenting

Critical thinking skills

Excellent communication skills

Strong interpersonal skills

Database Management

Exceptional organisational skills

---

## PROFESSIONAL EXPERIENCE

### Soften Technologies

July 2024 - Present

#### Java Full Stack Intern

During my Java Full Stack Developer training, I worked on multiple projects, both small and large, utilizing technologies such as Java Swing, Spring Boot, Hibernate, and JSP. I gained hands-on experience in building user-friendly interfaces, optimizing database structures, and streamlining development processes to deliver efficient and scalable solutions. These projects enhanced my technical expertise, problem-solving abilities, and collaboration skills, preparing me to tackle real-world development challenges.

### Ippera Food And Grocery Delivery

March 2020 - oct 2020

#### Digital Marketing Executive Intern

Worked closely with marketing specialists, copywriters, and graphic designers to create landing pages optimized for search intent. This collaboration focused on aligning content and design to enhance user engagement. As a result, conversion rates increased by 20% on average through targeted improvements.

---

## PROJECTS

### DocLive (Clinic Management System)

Developed DocLive, a clinic management system using Java, JSP, Servlets, and core Java. Focused on appointment scheduling and patient management. Gained hands-on experience in backend development and database integration.

### PhishGuard (Fake News Detection And Phishing Detection)

Developed PhishGuard, a platform for fake news detection and phishing website identification, using Machine Learning. The system analyzes web content to flag potentially harmful sites and fake news, helping users avoid online threats. Gained experience in applying ML algorithms for web security solutions.

### GoQRide (QR Based Ticket Booking System)

Developed GoQRide, a paperless self-ticket booking system with unique QR codes for each bus. Users can easily book tickets by scanning the QR code, while conductors track passenger numbers. The system enables bus owners to monitor performance, collections, and passenger count in real-time.
